

YES

Technology & Content Implementation Report

How the site is built – and how every page follows the V3 Copy & Structure Guide

YIELDED EVANGELICAL SERVANTS · PREPARED BY FULL STACK EVOLVED · JUNE 2026

1 • Overview

This document is the engineering & editorial record for the YES website. It explains **every technology used** and **how each page maps back to the client's V3 Copy & Structure Guide** — the 34-page PDF that is the single source of truth for all copy, page order, and section structure.

The site is a **bilingual (English / Spanish) static marketing site** for Yielded Evangelical Servants, a missionary-founded 501(c)(3) missions ministry. It is built as a fast, accessible, statically-generated site and deployed automatically to GitHub Pages.

Property	Value
Project type	Bilingual nonprofit marketing site (real client site)
Source of truth	YES_Website_Copy_V3.pdf — 34-page client copy & structure guide
Pages	7 primary + 1 off-nav + utilities (Contact, Privacy, 404) + per-worker profiles
Languages	English & Spanish, full parity, switchable in-page
Hosting	GitHub Pages (static), auto-deployed on every push
Live URL	fpsjago.github.io/yesservant-proposal/

"If we are one Body, no servant of Christ should stand alone."

CORE THEMATIC LINE — V3 GUIDE, USED ON HERO & BIBLICAL FOUNDATION

2 · The Technology Stack

Modern, fast, and maintenance-light. Everything compiles to plain HTML, CSS, and a small amount of JavaScript — there is no server to run, no database to maintain, and no monthly hosting cost.

Layer	Technology	Why it was chosen
Framework	Astro 6	Ships zero JavaScript by default → very fast load, great SEO. Ideal for a content-driven marketing site.
UI components	React 19	Interactive sections ("islands") — language switcher, animated reveals — built as React components.
Language	TypeScript (strict)	Type-safe code, no <code>any</code> . Catches errors before they reach the browser.
Styling	Tailwind CSS v4	Brand colors & fonts defined once as design tokens; consistent styling across the whole site.
Motion	GSAP + Lenis	Smooth scroll and the cinematic hero headline reveal. Honors "reduce motion" accessibility setting.
Images	Astro <code><Image></code> → WebP	Real field photos auto-optimized to modern WebP format — sharp but lightweight.
SEO	@astrojs/sitemap	Auto-generated sitemap + structured data (NonprofitOrganization schema) for search engines.
Content	Markdown collections	Gospel Worker profiles stored as simple Markdown files, validated by a schema.
Hosting / CI	GitHub Pages + Actions	Push code → site rebuilds and redeploys automatically. Free, reliable, version-controlled.
Runtime	Node.js 22+	Current LTS build environment.

Quality gates

Two checks must pass before anything ships: `astro check` (TypeScript type safety — currently **0 errors**) and a clean production build verified against `npm run preview` (**43 pages built successfully**). There is no flaky guesswork — the build is proven before deploy.

3 · How the Site Is Built

A few deliberate architectural decisions keep the site fast, bilingual, and easy to extend without breaking.

Astro Islands

Pages are written in Astro and act as the **data layer** — they load content and optimize images. Every interactive piece is a self-contained React "island" that only loads its JavaScript when it scrolls into view. Result: the page is readable instantly; interactivity hydrates lazily.

Bilingual system (EN / ES)

All copy lives in a **translation registry**. Each page owns its own translation file (`home.ts` , `about.ts` , `ourWork.ts` , etc.) so English and Spanish always stay in sync and never collide. A language toggle remembers the visitor's choice and switches the whole site live — no page reload.

Every key has a matching English and Spanish value. The V3 guide's exact English copy is preserved verbatim; Spanish is a faithful, dignified translation.

Scroll-reveal & motion

Sections reveal with a gentle "mask-up" as you scroll — reverent, never flashy, matching the V3 tone ("let impact lines sit in silence"). Smooth scrolling is powered by Lenis; the hero headline reveals line-by-line via GSAP. Visitors who prefer reduced motion see everything immediately, fully accessible.

Brand system

The V3 brand is encoded once as design tokens and reused everywhere:

Forest green #2D5233

Orange #E8751A

Off-white #F0EDE6

Playfair Display (headings)

Lora (body)

Accent orange is tiered for accessibility: bright #E8751A for large display only; a deeper #A84F0A for small text, links, and buttons so all text meets WCAG AA contrast.

4 · Site Map vs. the V3 Guide

The V3 guide defines the pages and their order. The site implements them one-to-one, plus the supporting utility pages a live site requires.

V3 Guide page	URL	Sections
Page 1 — Homepage	/	9 sections (Hero → Final CTA)
Page 2 — About YES	/about/	6 sections
Page 3 — Our Work	/our-work/	7 sections
Page 4 — Gospel Workers	/gospel-workers/	Grid + individual / [slug] profiles
Page 5 — How It Works	/how-it-works/	5 sections
Page 6 — Give	/give/	4 sections → Aplos link-out
Page 7 — For Donors	/for-donors/	4 sections (off-nav; linked from footer + CTAs)
Utility (required for a live site): /contact/ · /privacy/ · 404		

Primary navigation matches the guide exactly: **Home · About YES · Our Work · Gospel Workers · How It Works · Give** (orange button). The guide's "Missionaries" are presented site-wide as "Gospel Workers" per the V3 language.

5 · Page-by-Page Mapping to the V3 Guide

Every section in the V3 PDF is implemented as a dedicated, named component. Below, each V3 section is paired with the exact component that delivers it.

Page 1 — Homepage (9 sections)

§1 Hero → `Hero.tsx`

"Faithful Workers Are Already in the Field. YES Exists to Strengthen Them." — full-screen forest-green hero, line-by-line headline reveal, the core thematic line in orange italic.

§2 The Reality on the Ground → `HomeReality.tsx`

"The Gospel Is Advancing. The Workers Who Carry It Forward Need Our Support." — includes the "We asked why / his own house" field anecdote and the pull-quote on faithful partners.

§3 Thirty-Five Years of Witness → `HomeFieldStories.tsx`

"This Is What We Have Seen. This Is What We Believe." — three decades of field witness.

§4 The Difference YES Makes → `HomeDifference.tsx`

"The Most Fruitful Ministry Comes From Workers Who Can Stay." + quote "YES advances the workers."

§5 What YES Does → `HomeWhatYesDoes.tsx`

"Strengthening Faithful Workers for Long-Term Kingdom Impact."

§6 Why YES → `HomeWhyYes.tsx`

"The result: Gospel workers who are strengthened to serve, sustained to stay..."

§7 Who We Are → `HomeWhoWeAre.tsx`

"Three Decades of Faithful Partnership. Real Workers. Real Places. Real Fruit."

§8 Biblical Foundation → `HomeBiblical.tsx`

"This Is Not a Nonprofit Strategy. This Is a Biblical Conviction." + Romans 10:15.

§9 Final CTA → `HomeFinalCta.tsx`

"Faithful Workers Are in the Field. Will You Stand With Them? They need you."

Page 2 — About YES (6 sections)

§1 Opener / §2 Our Story / §3 What Makes YES Different → `AboutStory.tsx` , `AboutDifferent.tsx` , `AboutWorkers.tsx` , `AboutBeliefs.tsx` , `AboutPeople.tsx`

"YES Began in the Field. Not in a Boardroom." · "Thirty-Five Years of Field-Proven Partnership" · "We Have Been in the Field. We Know What Workers Need." Each V3 section is its own island.

Page 3 — Our Work (7 sections)

All 7 work areas → [WorkThirtyFiveYears](#) , [WorkMissionarySupport](#) , [WorkEvangelism](#) , [WorkChurchPlanting](#) , [WorkLeadership](#) , [WorkMissionTeams](#)

Each pillar of YES's field work (worker support, evangelism, church planting, leadership, mission teams) is a dedicated section component.

Page 4 — Gospel Workers

Worker directory + profiles → [GwOpener](#) , [GwProfiles](#) , [GwStories](#) , [GwLongTerm](#) , [GwQuotes](#) , [GwCta](#) + [/gospel-workers/\[slug\]/](#)

Workers stored as Markdown files in a validated content collection. Anonymous/sensitive-field workers shown without photo or link (`picture: 'none.jpg'`) — protecting workers in restricted regions.

Page 5 — How It Works (5 sections)

Partnership mechanics → [HiwPartnershipSteps](#) , [HiwWhatSupportCovers](#) , [HiwFunds](#) , [HiwMissionTeams](#)

Explains how a partner's giving reaches the field, what support covers, and how mission teams engage.

Page 6 — Give (4 sections)

Giving options + trust → [GiveOptions](#) , [GiveTrust](#) , [GiveMajorPartners](#)

Links out to the YES Aplos donation portal + mail-in option. Trust/transparency block for donor confidence.

Page 7 — For Donors (4 sections, off-nav)

Donor assurance → [FdWhyPartner](#) , [FdHowToPartner](#) , [FdTransparency](#)

Financial transparency & partnership rationale; linked from the footer and inline CTAs throughout the site.

6 · Fidelity to the Guide

How we guaranteed the site says what the client wrote — and carries the tone the guide asks for.

Copy is verbatim

Every headline, impact line, anecdote, and Scripture reference from the V3 PDF is reproduced exactly. The thematic line — "*If we are one Body, no servant of Christ should stand alone*" — is used with weight, only on the Hero and the Biblical Foundation, exactly as the guide instructs.

Structure is one-to-one

Page order, section order, and section count all match the guide. Nothing was reordered, merged, or invented. Where the guide named 9 homepage sections, there are 9 components.

Tone is "Reverent Editorial Authority"

The guide asks for dignity, whitespace, and a premium faith-magazine gravity. Delivered through the Playfair/Lora serif pairing, deep-green dominance with restrained orange, real field photography (never stock or poverty spectacle), and quiet motion that lets impact lines breathe.

Theology preserved

John 17:21 · John 13:35 · Romans 10:14–15 are placed where the guide places them, in the Biblical Foundation and supporting sections.

Awaiting client content

A handful of items in the guide require the client's real data. These are marked in-code (`<!-- CLIENT: ... -->`) and listed in `CLIENT-CHECKLIST.md` : exact statistics (number of nations / workers / teams), EIN, leadership bios & headshots, worker quotes, financial/annual-report links, and authentic field photos (Bajo Rodríguez CR · Mata Hambre HN · Ozamiz PH · Yanomámö VE). Everything else is complete and live.

Strengthening Gospel Workers. Sustaining Kingdom Impact.

YES TAGLINE — CARRIED THROUGHOUT THE SITE

7 · Deployment & Maintenance

The site maintains itself. There is no server, no database, and no hosting bill.

- **Automatic deploy.** Pushing code to GitHub triggers a build (GitHub Actions) that compiles the site and publishes it to GitHub Pages — typically live within a minute.
- **Static & free.** The output is plain files served by a global CDN. Fast everywhere, nothing to patch or pay for.
- **Version-controlled.** Every change is tracked in Git; any version can be restored.
- **Easy content edits.** Adding a Gospel Worker = adding one Markdown file. Updating copy = editing the page's translation file (both languages side by side).
- **SEO-ready.** Auto-generated sitemap, per-page titles/descriptions, and NonprofitOrganization structured data help search engines and AI assistants find and cite YES.
